Specifications

Deco Fence® Promo Range is all manufactured using EXTRA strong aluminium four fin horizontal rails which have been NATA tested to be 45% stronger than a standard hollow rail. The 16mm round vertical bars spaced at 90mm centres pass through the rails and are securely welded into position under the rails out of sight. This ensures that all fencing in this range exceeds the Australian Standards for pool compliance (AS 1926.1-2007), and being made from long lasting powder coated aluminium makes it the ultimate choice. Refer to Local Councils for specific requirements. Driveway gates cannot be integrated into a pool fence.
